

Akash Rajesh Marodkar

Amravati, Maharashtra, INDIA • (+91) 7972361753

• akashmarodkar369@gmail.com

To secure a challenging position in a tech-driven environment, aiming to enhance my technical skills while contributing to innovative projects and solving complex problems.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering

P. R. Pote (Patil) College of Engineering & Management, Amravati

Sant Gadge Baba Amravati University (SGBAU)

Status: Pursuing (6th Semester)

CGPA/Percentage: 61% (up to 6th Semester)

Expected Graduation: 2026

Higher Secondary Certificate (HSC)

Arunodaya Junior College of Science, Amravati

MSBSHSE | 74% | 2022

Secondary School Certificate (SSC)

Arunodaya English School, Amravati

MSBSHSE | 73% | 2020

TECHNICAL SKILLS

- Programming Skills: C, Python.
- Designing Language: HTML, CSS, React.js.
- Database: MySQL, MongoDB.

INTERNSHIP

- Python for Data Science – NPTEL (Conducted by IITs, Govt. of India)
- Data Engineering Virtual Internship – AICTE & Eduskills (Govt. of India)

- Data Science Master Virtual Internship – AICTE & Eduskills (Govt. of India)
- Web Full Stack Developer Virtual Internship – AICTE & Eduskills (Govt. of India)
- Python Full Stack Developer Virtual Internship – AICTE & Eduskills (Govt. of India)

PROJECTS

Employee Management System

- Technologies: Python, MySQL.
- Developed a Python-based Employee Management System to efficiently manage employee records using a MySQL relational database.
- Implemented CRUD operations (Add, View, Update, Delete) through a menu-driven console interface.
- Used MySQL Connector/Python to connect the application to the database and execute SQL queries.
- Designed structured database tables with primary keys to ensure data integrity and consistency.
- Applied exception handling and input validation to enhance reliability and user experience.

Heart Disease Prediction using Machine Learning

- Developed a supervised machine learning model to predict the likelihood of heart disease using patient data such as age, cholesterol, blood pressure, and more.
- Performed data preprocessing, feature selection, and model evaluation using algorithms like Logistic Regression, Random Forest, and KNN to achieve thresholds for medical relevance.
- Implemented confusion matrix, ROC-AUC, and precision-recall analysis to assess model performance and optimize classification thresholds for medical relevance.

LANGUAGE PROFICIENCY

- ENGLISH
- HINDI
- MARATHI

I hereby declare that the information provided above is true to the best of my knowledge and belief.
